## Environmental Insurance

*Is your site right? A 10-point checklist to help you make sure*

### Storing and handling oils, chemicals and other risky materials

✓ / ✗

1. Are storage containers fit for purpose, regularly inspected and maintained?
2. Are storage areas and containers sited away from watercourses, drains and unsurfaced areas?
3. Do storage containers have secondary containment, such as a bund, to contain any leaks or spills?
4. Do you have procedures and training for safe delivery and handling of materials?

### Waste management

5. Is your storage and handling of waste safe and does it comply with the law?
6. Do you know where your waste goes? Are you sure it's disposed of correctly?
7. Are you reducing and recycling your waste?

### Site Drainage

8. Do you have an up-to-date drainage plan of your site?
9. Is your site drained correctly?
  - only clean water, such as roof drainage, to surface water drains.
  - all contaminated water, such as sewerage and trade effluent, to foul drains.

### Dealing with pollution emergencies

10. Do you have a plan, equipment and training to deal with pollution emergencies?

If you answer 'no' to any of the above questions, or are unsure, you really should consider seeking appropriate advice. CLA Insurance Services has access to a range of specialist environmental services and a range of specialist environmental insurance policies.
